Military Status: Exempted | tahajraliieldin-ship-it.github.io/taha-alieldin-portfolio

Summary

Mechatronics Engineer in an HVAC Technical Office role, handling shop drawings, price offers and site coordination. Led an 8-member team building an ASRT-funded autonomous surveying swarm. Industrial training at ENPPI and Norpetco; strong negotiation and presentation skills from a #1 sales role.

Professional Experience

AES (Advanced Engineering Services), Technical Office & Site Coordination Engineer	07/2026 – Present
- Prepare HVAC shop drawings in AutoCAD and revise them per site and consultant comments. - Coordinate with site teams to resolve installation issues and keep work matched to approved drawings. - Prepare quotations: quantity take-offs, material and equipment pricing in Excel, then present them to clients and support negotiation.	
ENPPI, Instrumentation & Control Intern	07/2025
Studied instrumentation and process control (sensors, transducers, P&ID) with exposure to SCADA, PLC, and DCS systems.	
Norpetco (North Petroleum Company), Production & Field Operations Trainee	07/2023 – 08/2023
Completed office and on-site field training, observing power generation, artificial lift equipment (Lufkin beam pumps, ESP), and firefighting systems.	
Fitness Time Gym, Sales & Customer Service Representative	2022 – 2025
#1 Sales Representative, generating ~300K EGP in monthly revenue.	
	Mokattam, Cairo

Certifications & Courses

Advanced Automation, HA Consulting Group	06/2026 – Present
Expected January 2027.	
Basic Automation, HA Consulting Group	07/2024 – 09/2024
A+ in all three modules: Classic Control, PLC Basic Programming (ladder logic, Siemens TIA Portal), and Electric Motor & Drive Programming (VFDs).	
OSHA Construction & Industry Safety Course, Orascom Construction	02/2025

Education

Ain Shams University, BSc. Mechatronics Engineering	09/2021 – 07/2026
Graduation project grade: A+	

Selected Projects

AI-Enhanced Autonomous Surveying Swarm, Graduation Project	08/2025 – 06/2026
Led an 8-member team to build an autonomous surveying swarm on ROS 2 (Humble). Built Voronoi coverage algorithms and Gazebo simulations; pitched the prototype to win a 100K EGP grant from ASRT.	
Automated Production Line, Siemens TIA Portal & Factory I/O	
Programmed & simulated production line on a Siemens S7-1200 with a HMI — color sorting, four CNC stations, and two-axis pick-and-place.	

Technical Skills

- Control & Automation:** PLC (ladder logic), classic control, LQR, state machines.
- Programming & Tools:** MATLAB/Simulink, Python, C++, ROS 2, Gazebo, OpenCV, Automation Studio.
- Mechanical/Design:** AutoCad, SolidWorks, Ansys.
